THINK MEDICAL CAREER

A great variety of challenging and rewarding careers await today's students in our nation's hospitals. Long a major employer, the hospital today offers career opportunities to tempt the imagination and ambition of practically every young person. ■ The dramatic growth of hospital services has produced a corresponding increase in the number and variety of hospital careers. Doctors and nurses have been joined by writers, artists, engineers, librarians, secretaries, and many other professionally educated and skilled persons. ■ Today nearly every skill, profession, talent and trade is represented in the hospital. Some institutions number more than 200 different job classifications, ranging from accountant to x-ray technologist. ■ The Adventist hospital with its concept of treating the whole man urges you to become part of the health team. Your inquiries regarding specialized training or for employment in the area of your interest are invited.
